

ARIZONA TREASURES ~

Mining, Mining Camps,

Mines (fact and fable),

Prospecting, &

Treasure Hunting

A

SELECTED

BIBLIOGRAPHY

of materials in the
Arizona Dept. of Library, Archives & Public Records
RESEARCH DIVISION

Compiled by Marianna Hancin ~ August 1980

The mines of Arizona, varied and numberless, are no doubt the sources of the future wealth of the Territory, and consist of gold, silver, copper, lead, iron, coal, salt, and perhaps of other valuable minerals. These mines, especially those of the precious metals, and of copper and lead, are of wonderful extent and richness, and are destined at no distant day to astonish the world by the immensity of their product...

Wonderful reports have been circulated, from time to time, of rich [gold] placers in the northern and eastern parts of the Territory, which are said to have been seen by explorers long since, or by captives among the Apaches, and several expeditions have been fitted out for their discovery, but as yet without success. Some of these wonderful reports may be true, but doubtless many of them are more imaginary than real.

The great permanent mineral wealth of the Territory is in its numerous rich and extensive lodes of gold, silver, copper, and lead. These lodes are found in almost every mountain, hill, and picacho peak in the Territory. Where ever one may go, north, south, east, or west, these lodes are found in almost endless profusion...

A full description of the different mineral belts of the country, of the locations made, and of the mines already opened, would fill volumes...

Hiram C. Dodge
1877: Arizona As It Was
Pages 61, 67

INTRODUCTION

Arizona has always attracted miners, prospectors, and other treasure seekers. Since Territorial days the Research Library of the Department of Library, Archives and Public Records has been a source of information for both those seeking the mineral treasures of the state and those writing about the seekers and the treasures. During the last five years use of the Library for this purpose has steadily increased.

This selective bibliography of the Library's holdings on the many aspects of Arizona's mineral wealth has two purposes. First, it is intended to aid researchers in the field, and to direct them to further sources. Second, it is intended to be a promotional tool--used to introduce potential researchers to the wide variety of resources available in the Library.

Included in the bibliography are monographs, newspapers, periodicals, fiction, federal documents, state documents, maps, and miscellaneous

materials representative of the collection. Publication dates range from 1854 through August, 1980. This is not intended to be a comprehensive listing of the Library's resources on the topic of mining and treasure hunting. Periodical and newspaper citations are intentionally few in number, but are listed to give an indication of sources for further search.

The bibliography is arranged within broad subject areas by author, and cross-referenced only when considered to be especially useful. (Cross references are indicated by "Gold-Panning Pete.") Title and author indexes are not provided, since the subject approach with cross references was considered more appropriate and quite sufficient.

Bibliographic information provided includes author, title, city of publication, publisher, and date published. For serials such as annual reports, the Library's holdings are listed in the area for publication date. To the left of the citation is the Item Number established only for purposes of this bibliography. To the right is the Library's call number. Other notes of interest may also be

included when appropriate, such as identifying special characteristics of the material.

A GUIDE TO LIBRARY SOURCES

Monographs

For additional monographic holdings the card catalog can be searched under subject headings such as:

GHOST TOWNS
GOLD MINES AND MINING--ARIZONA
LOST MINES AND HIDDEN TREASURES
MINERALOGY--ARIZONA
MINERS--ARIZONA
MINES AND MINERAL RESOURCES--ARIZONA
MINING INDUSTRY AND FINANCE--ARIZONA
PROSPECTING
TREASURE TROVE--ARIZONA

Also look under subject headings for names of individual ghost towns, mining camps, miners, treasures, and minerals.

Newspapers

The Library has the most extensive holdings of Arizona newspapers in the state, both original and microfilm copy. General holdings information will be found by consulting the Arizona newspaper rolodex at the main reference desk. This lists holdings of each title by years; for more specific dates the Serials Librarian may be consulted. If the exact title of the newspaper is not known, the Reference Librarian can consult the shelflist which is arranged by city of publication.

Newspaper holdings consist of over 500 separate titles published since the 1860's. A very

select few which are useful in the general subject field of mining are:

Ajo Copper News, 1916-to date
Bisbee Daily Review, 1905-to date
Copper Era (Clifton), 1899-to date
Mining Journal (Clifton), 1915-1919
Jerome News, 1903-1918
Mohave County Miner (Kingman), 1897-1974
Arizona Silver Belt (Miami), 1897-1906,
1929-to date
Oatman Mining News, 1915-1921
Phoenix Gazette, 1880-to date
Prescott Journal Miner, 1903-1934
Tombstone Epitaph, 1886-1898, 1915-to date
Arizona Daily Star (Tucson), 1889-to date

Indexing for Arizona newspapers has large gaps. The newspaper subject index located in the reading room contains over 4,000 entries on mines and mineral resources, with further subdivision for such topics as claim jumping, frauds, gold, mining hoaxes, and prospecting. Although for the last several years the majority of citations are taken from the Arizona Republic, articles from other selected newspapers are included. Also, a number of newspapers from territorial days have been indexed thoroughly. The Library has separately published indexes for the Arizona Daily Star for the years 1953-1965, and 1975 (call number: Ariz. q071 A714.) In addition, Thomas Probert's bibliography Lost Mines and Buried Treasures of the West (see Item No. G-21) cites numerous newspaper articles on individual mines and treasures. A newspaper clipping file is also maintained, and articles may be retrieved using subject

headings similar to those in the main card catalog and the newspaper subject index.

Periodicals

The Library has extensive holdings of all periodicals published about Arizona and the West. For specific holdings consult the periodicals rolodex at the main reference desk or the Serials Librarian when necessary. Besides indexing for individual periodical titles, there are several other sources to search. David Goodman's Arizona Odyssey; Bibliographic Adventures in Nineteenth-Century Magazines (call number: Ariz. q016 G65) has a 46-page section on mining. Arizona Index: A Subject Index to Periodical Articles About the State, compiled by Donald M. Powell and Virginia E. Rice (call number: R 050.9 P88) is a two-volume set published in 1978; the Library also subscribes to its card-format updating service. In addition, Probert's Lost Mines and Buried Treasures of the West (see Item No. G-21) includes periodical articles. There are, of course, the standard indexing services such as Reader's Guide to Periodical Literature and Access.

Federal Documents

The Library is a regional depository and as such receives designated documents. Most federal documents relating to Arizona are cataloged into the Arizona collection, but for additional

documents on mining and prospecting in general, consult the Documents Librarian.

State Documents

Most Arizona state documents are cataloged into the Arizona collection. However, since 1979 the Library has been converting to a KWOC index for state documents, so both the card catalog and the KWOC index located at the main reference desk should be consulted for additional materials.

Maps

In addition to those maps listed in this bibliography (see Items No. H-1 through H-9), the Library maintains an extensive Arizona map collection. The collection includes maps of the U.S. Geological Survey. The map collection is housed in the basement.

Photographs

Besides books consisting largely of photographs (for example, see Items No. F-20 and G-11), a collection of photographs of Arizona history, including mining towns and miners, is maintained in the Library. Reprints of these photographs may be obtained.

Vertical File Materials

The vertical file contains pamphlets, brochures, sheets, maps, etc., on Arizona towns, counties, and points of interest, including ghost towns and mining camps.
